

Appln. No. 10/621,149  
Amendment dated September 30, 2008  
Reply to Office Action mailed August 7, 2008

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims** (deleted text being struck through and added text being underlined):

1. (Previously Presented) A method of writing information to a storage device, the method, implemented in the storage device comprising:  
receiving a dual write command to write information to the storage device;  
determining two locations on the storage device to write the information;  
performing a single reading of the information to be written into a read buffer;  
writing the information to both of the two locations based on the single reading of the information;  
wherein the read buffer is not cleared between the writing of the information to both of the two locations; and  
wherein a first one of the two locations is within a reserve area of the storage device and a second one of the two locations is outside of the reserve area of the storage device;  
wherein one of said two locations is determined based on an address spread within the dual write command.

2. through 3. (Cancelled)

4. (Previously Presented) The method of claim 1 wherein the information to be read is associated with a bit flag designating a dual write operation.

5. (Previously Presented) The method of claim 1 wherein the information to be read contains header designating a dual write operation.

6. through 8 (Cancelled)

Appln. No. 10/621,149  
Amendment dated September 30, 2008  
Reply to Office Action mailed August 7, 2008

9. (Previously Presented) The method of claim 1 wherein the storage device comprises a disk drive.

10. (Cancelled)

11. (Previously Presented) The method of claim 1 wherein the two locations comprise the first~~a-first~~ location and the second~~a-second~~ location, the second location being based upon a calculation performed on the first location.

12. (Original) The method of claim 1 wherein the information is written to both of the locations during a same write cycle.

13. (Original) The method of claim 1 wherein writing the information to both locations comprises writing the information to a plurality of locations comprising both locations and at least one additional location.
